EON

One Brain · Multi Decision Layer for your ERP

Daffodil International University

An intelligence that truly knows accounting — ERP, payroll, ledger, journal and advanced bookkeeping, to a CA's standard. Just speak: it catches every error, posts the entry, and chases the follow-ups by itself. Errorless — and it never forgets.

500K
context memory

1,200
accounting books known

1M
files read

$3.6B
of errors found

It keeps the books.
It knows the standards.
It acts on your voice.

EON reads **every company in the group** — ledgers, payroll, people and cash — with a chartered accountant's rules built in. Speak in English or বাংলা: it posts the entry, finds the error, reconciles the ledger and tells you what is coming.

"Dr Salary 50,000, Cr Bank."
→ **Journal posted. Ledger updated.**

রাব্বির খাতা মিলিয়ে দাও।
→ **Reconciled — ৳1.4 L paid in advance.**

"Who is idle this week?"
→ **7 staff flagged. Evaluations ready.**

ASK EON — SERVER · OFFLINE BRAIN · SPEECH READY

EON answering in the Command Center

AND IT ALSO

- Closes the books
- Audits its own entries
- Reconciles banks & parties
- Projects cash and revenue
- Rates every employee
- Updates vendors & agents

JUST SAY IT OUT LOUD

"Close the month and show me what is wrong."
এই মাসের লাভ-ক্ষতি দেখাও।

WHY YOU CAN ACT ON IT

A **working prototype**, already running on a live 12-company ERP. There is **no language model** inventing a plausible paragraph — EON reads your ledger, applies your own rule and shows the working, so a figure here is one you can take to your board.
