One Brain. Multi Decision Layer for your ERP.

EON answers a business question from your **live ERP** — in English, বাংলা or Banglish. Not a chatbot reading a document: every figure is computed from the ledger, with the rule that produced it and the action to take next.

WHAT IT DOES FOR THE BUSINESS

- Accounts, payroll, HR, sales and CRM — answered together
- Says the rule it applied, not just a number
- Flags what is waiting on your approval today
- Drafts the reminder, notice or warning for you
- Speaks **বাংলা** as naturally as English

45 business subjects

3 languages, written natively

203 ERP tables read directly

0 language models

আমাকে বাংলায় জিজ্ঞেস করুন।

“What did we spend on marketing in June?”
চলতি মাসে লাভ কত?

WHY YOU CAN ACT ON IT

There is **no language model** inventing a plausible paragraph. EON reads your ledger, applies your company’s own rule and shows the working — so a figure on this wall is a figure you can take to your board.
