AN INDEPENDENT BUSINESS INTELLIGENCE

It keeps the books.
It knows the standards.
It acts on your voice.

EON reads **every company in the group** — ledgers, payroll, people and cash — with a chartered accountant's rules built in. Speak in English or বাংলা: it posts the entry, finds the error, reconciles the ledger and tells you what is coming.

"Dr Salary 50,000, Cr Bank."
→ Journal posted. Ledger updated.

রাব্বির খাতা মিলিয়ে দাও।
→ Reconciled — ৳1.4 L already paid in advance.

"Who is idle this week?"
→ 7 staff flagged. Evaluations ready.

JUST SAY IT OUT LOUD

"Close the month and show me what is wrong."
এই মাসের লাভ-ক্ষতি দেখাও।

Ask it yourself
eon.gulfrabit.com

AND IT ALSO

- Closes the books
- Audits its own entries
- Reconciles banks & parties
- Projects cash and revenue
- Rates every employee
- Updates vendors & agents

WHY YOU CAN ACT ON IT

A **working prototype**, already running on a live 12-company ERP. There is **no language model** inventing a plausible paragraph — EON reads your ledger, applies your own rule and shows the working, so a figure here is one you can take to your board.

45 business subjects

3 languages, natively

203 ERP tables read live

আমাকে বাংলায় জিজ্ঞেস করুন।
